Research

- Usability Testing
- A/B Testing
- Comparative Analysis

Tools

- Figma
- Illustrator
- Photoshop
- Linear

AI & Prototyping

- Claude
- ChatGPT
- Grok / Grok Build

WORK EXPERIENCE

loanDepot / Principal Product Designer

Feb. 2025 - Oct. 2026, Remote

- Led product strategy and end-to-end design from concept through production, including enterprise ecosystem planning, AI-assisted product development, and cross-product experience strategy.
- Designed a next-generation, chat-based mortgage loan application experience structured to support future AI-powered workflows and conversational interactions.
- Built working prototypes and lightweight internal tools to accelerate product planning, stakeholder alignment, and development discussions with AI coding agents.
- Designed a mobile experience for loanDepot's desktop Point-of-Sale platform, translating complex loan-origination workflows into a streamlined smartphone experience.
- Reorganized tools, information, and tasks around the chronological loan-origination journey, reducing complexity and making high-value actions easier for Loan Officers to find and complete.
- Developed product concepts and interactive prototypes to explore future-state mortgage experiences, validate direction, and communicate product strategy to leadership and engineering.

loanDepot / Senior UX Designer

Jan. 2022 - Feb. 2025, Remote

- Designed UX/UI experiences for loanDepot's mobile application and consumer loan-servicing portal.
- Created and refined design-system components and standards to improve consistency across digital products and strengthen a unified corporate experience.
- Collaborated with product managers, engineers, and business stakeholders to translate complex mortgage and servicing requirements into intuitive digital experiences.
- Developed concepts for a unified customer portal designed to reduce fragmentation across origination and servicing experiences.

Logic 20/20 / Senior UX Designer

Jun. 2021 - Dec. 2021, Seattle, WA

- Designed a B2B platform for San Diego Gas & Electric supporting builders, contractors, and other professional users.
- Created personas, user flows, and interactive prototypes based on business and user requirements.
- Translated complex operational requirements into scalable UX solutions that guided engineering implementation.

Tata Consulting Services / UX Design Specialist - Microsoft Azure

Jun. 2019 - Mar. 2020, Bellevue, Washington

- Designed internal tools for Microsoft Azure teams, collaborating daily with product managers and engineers on product features, workflows, information architecture, and user experience.
- Researched and developed scalable UI patterns and pixel-accurate prototypes based on complex technical requirements.
- Managed design assets and development coordination across Microsoft SharePoint and Visual Studio workflows.
- Earned invitations from Product Managers to participate in leadership deep-dive product discussions after demonstrating strong product and UX judgment.
- Supported up to five Product Managers simultaneously while managing a high-volume pipeline of design work.

EARLIER EXPERIENCE

Senior Digital Designer, Genesis Gaming — Taipei, Taiwan
Senior UX Designer, THLight — Taipei, Taiwan
Principal Interaction Designer, Artgital Interactive Solutions — Taipei, Taiwan

EDUCATION

University of Washington / B.A. in Interdisciplinary Visual Arts

Oct. 2001 – Dec. 2004, Seattle, WA
